Mission statement:

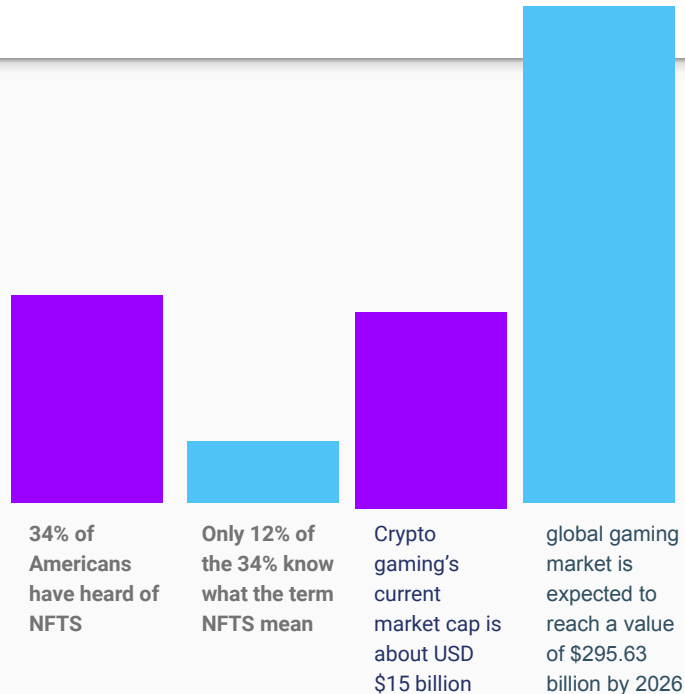

To create an ecosystem that transgresses traditional blockchain users and engages the user through the use of NFT functionality. Converging gamification, decentralization, and the financial utility of NFTs to increase metaverse literacy and growth.

People are aware of the terms NFTs and Metaverse but are unaware how to engage in their ecosystems.

Propaganda and FUD has created a negative connotation around the terms NFTs and Metaverse that can be solved with crypto/blockchain literacy.

Major demographics at varying socio-economic levels in the arts and gaming community have yet to be tapped due to a lack of relatable peers within the industry which stalls exponential growth

THE SOLUTION

Sol's Evolution is an affordable revolutionary NFT collection created not just to be evolving artwork but also to act as a mutual fund for hodlrs, charity powerhouse, Metaverse social club, and trusted education vessel for those interested in cryptocurrency. We're committed to teaching financial literacy of the future.

The Stages of Sol's Evolution

The first ever art evolving NFT collection. Created on the Solana Blockchain for speed, utility, and affordability

Mesozaiac:

The beginning of our journey in a Sol's Evolution. Ancestors of the universe. Traits can be traced from this era onwards to determine stature. The only era where the coveted rare Sol's eggs can be found.
Dinosaurs, animals, insects.

Prehistoric:

The point in Sol's Evolution where man develops from ape. Wheels for travel, language for communicating, and weapons for colonizing allow for neanderthals to rise into pharaohs.

Philosophical:

The age of Enlightenment. It is here we see human nature feed off of the fruits from colonization for both good and evil.

Modern:

Where man battles himself into the future. War is imminent and technology and information is expansive.

Advanced:

Humans have attained technological perfection and are now looking to transcend galaxies and dimensions in the quest for Utopia.

Intergalactic:

Humans are now intertwined with artificial intelligence and the great migration of the universe is underway. Immortality makes anything one can imagine, imminent.

Soltrix:

TBD

Q1 2022

Research and Development.
Recruit Team. Complete collection. Begin to develop a community through digital grassroots campaigning. 1st Quest of Whitelist begins

April//June 2022

First vote towards mutual fund goal. Collaborations and social meet-ups in various Metaverses

Q4 2022

Gamification. Minting of Sols Upgrades

Jan Feb Mar Apr May Jun Jul Aug Sept Oct Nov Dec

Feb/March 2022

Presale of 5,000 Sols and Public Sale. First event.
First charities to receive donations voted on by the community.

July/August 2022

2nd In-Person Event.
Gamification demo goes live.

Promoting Blockchain Financial Literacy

Step 1

Grassroots campaigning.
Build up a strong
community and coalition
through the use of
traditional crypto outlets
and AMAs

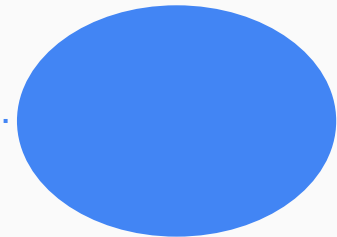

Step 2

- Bring in non traditional crypto users using education as a means to eliminate barriers to entry.
- Weekly short episodes (no longer than 5 minutes) explaining a metaverse/blockchain term. A documentary of entire process to be released after the first year

Step 3

Targeted ad campaigns
and paid
influencer/platform
marketing across multiple
demographics - ranging
from Billboard and
sticker campaigns to
traditional retweets and
shares

Kristin Smith

“Blockchain Smitty”

Kristin Smith is a political science graduate of Norfolk State University. As a former statewide organizer for Governor Terry McAuliffe and regional field organizer for The Human Rights Campaign, she specializes in grassroots campaigning and community organizing with a deep passion for building things from the ground up. Kristin - affectionately known as “Blockchain Smitty” has a vision of contributing to the mainstream adoption of crypto that is deeply rooted in a love for decentralization and blockchain technology . While politics and technology (a brief stint in software at Apple) have always been her profession, Blockchain Smitty’s true passion is the arts and the reason she is so inspired by the metaverse and drawn to the infinite inherent possibilities with NFTs. A former video director/editor, she has shot for a countless eclectic array of hip hop artists and also co executive produced and filmed/edited a wildly popular webseries “Against Da Grain” that has amassed over 1 million views.

Dominic Meece

“KadoWins”

CEO of Family Tithes Recording Studios, "Kado Wins" has been writing, engineering, and performing his own music, since the age of 13 and released his first album "The Gift of Verse-A-Tility" to the streets of Hampton Roads at the age of 16. As a previous Radio Personality on Clear Channel Radio and 103 Jamz, the largest hip hop radio outlet in VA, he has met and networked with DJ Khaled , Jadakiss DJ Drama, lil baby, no cap & etc. KadoWins soon developed hosting abilities and has hosted several events in the local community ranging from the HRTC Showcase, The Alapicia Awareness Charity Event, Berkley reunion, the Annual Afram Fest, and the Virginia Tech Dedication with Bruce Smith. Rising from the streets of Norfolk, Virginia, with a 90's hip-hop influence and a strong theatre/performing arts background, it's no wonder why Pusha T and Shomari Pawtry shouted out Kadowins and his Family Tithes studio in their most recent event as a pillar to the community the Virginia scene. The metaverse is a natural home for his artistic inclinations.
